

B	<p><i>Renal Pathophysiology: The Essentials</i></p> <p>ROSE Lippincott Williams & Wilkins, 1994, 351 pages, ISBN 0683073540</p> <p>An excellent review with explanations of various disease processes of the kidney. Includes review questions within the text that are intended for comprehension and are not written in boards style. Would serve as a good reference during boards review.</p>	\$36.95	Review
B	<p><i>Color Atlas of Pathophysiology</i></p> <p>SILBERNAGL Thieme, 2000, 380 pages, ISBN 0865778663</p> <p>A text containing more than 180 high-quality illustrations demonstrating disturbed physiologic processes that lead to dysfunction. Limited student feedback.</p>	\$39.95	Review
B	<p><i>BRS Pathology Flash Cards</i></p> <p>SWANSON Lippincott Williams & Wilkins, 2002, 250 cards, ISBN 0781737109</p> <p>A series of 250 pathology flash cards categorized by organ system. Effective when used with the <i>BRS Pathology</i> textbook, but not comprehensive enough when used alone. Most cards have only one high-yield fact.</p>	\$29.95	Flash cards
B	<p><i>Blueprints Notes & Cases-Pathophysiology: Renal, Hematology, and Oncology</i></p> <p>CAUGHEY Lippincott Williams & Wilkins, 2003, 208 pages, ISBN 1405103523</p> <p>This book follows the format of the Blueprints series, in which each case takes the form of a discussion followed by key points and a series of questions. The pathophysiology volumes would be a good companion to organ-based teaching modules, but the material is neither comprehensive enough nor sufficiently concise to be high yield for intensive boards preparation.</p>	\$28.95	Review
B	<p><i>Rypins' Intensive Reviews: Pathology</i></p> <p>DAMJANOV Lippincott Williams & Wilkins, 1998, 398 pages, ISBN 0397515553</p> <p>Typical of this series. Includes a comprehensive exam with answers and explanations. Illustrated with simple diagrams; no photos are included.</p>	\$21.95	Review/220 q
